I think Jeff had worked up some real rough cost estimates last year so that would be a starting point.

I think we will need some general understanding of that potential cost. Mosing task?

Hi Steve,

The whole concept of turning 3rd into a two-way got put on hold but it is was my understanding if we were to build it that we could route eastbound 4th Street traffic onto 3rd during Viking's game, which could include a Superbowl. I think the holdup is who would pay for the conversion.

Steve, do you think it might be possible to route (as we had some discussions relative to Welis Fargo/Ryan project) 4th Street as you head East making a two way 3rd/4th Street from Park to bottom of hill where roads go underneath 35W? I could see this being a necessary 4-5 week requirement in and around a Superbowl.

Let me know what you think about the possibility.

Thanks,
