Hi Matt,

I was finally able to get together our Tritium sampling data from around the state dating back to the early 90's. These samples are all ground water samples from public water supply wells. Please let me know if the information about each sample is sufficient.

For information pertaining to specific testing around a nuclear facility you will have to contact the Environmental Health Division's Radioactive Materials Unit. The Supervisor for that Unit is Sherrie Flaherty [REDACTED].

Sorry about the amount of time this took and thank you for your patience.

Robert Smude, P.E.
Supervisor, Administrative Unit
Drinking Water Protection Section
Minnesota Department of Health
[REDACTED]
