Subject: FTB groundwater modeling

Al and Erik,

I'd like to suggest a brief small-group meeting with Barr to get an overview of the 3-D modeling they plan to perform to evaluate the FTB groundwater capture system. I'm particularly interested to know how they will model the gravel trench and pipe for closure conditions (that is, when it is not being pumped). It would be good resolve this and other model issues before they spend two weeks generating results. This is just a suggestion for you to consider. Thanks.

Regards,

Fred
