Subject: ERM Posting New Mine Site & Plant Site Goldsim Models & Results

Deb (and all), please recall that we have been using ERM resources to provide access for the Cooperating Agencies (EPA; Bands) to the latest versions of PolyMet/Barr's Goldsim model and outputs for both the Mine and Plant Sites.

The next versions of both sets of products should be available sometime today or tomorrow. We've already got the Mine Site with the Plant Site pending. Once both are in, we'd like to have them posted on ERM's FTP site.

The last time we did an update was in late December when we got a new version of the Mine Site model and results. Andrea worked this for us very nicely.

Like I said we already have the new Mine Site files available...it's the Plant Site files that are coming in next (again, today or tomorrow). If it makes sense to go ahead and start the FTP site setup with just the Mine Site files...that's fine...it's also fine to wait till everything's in (both Mine and Plant Site) too. Whatever is easiest for your team is what we'll do.

Thanks in advance for your team's assistance with this task. Once we get the Plant Site in, if we can get them up by week's end (02/08/13) that will be fine. Let me know if there's any questions. Bill.
