**To:** Carlson, Erik (DNR)  
**Cc:** 'Jim Scott'; John Borovsky; Tina Pint; Beth Havlik; Pylka Kevin  
**Subject:** PolyMet NorthMet Water Modeling submittal - 07052012

Version 1 of the Mine Site and Plant Site GoldSim models have been posted to the project [Water Model Results website](#).

The complete model file packages are posted under the **Model Files – Version 1 – 5Jul2012** heading. These packages include:

- GoldSim model files
- GoldSim player files (free player software available [here](#))
- All input and output files
- Current Data Package and Work Plan documents

The model results spreadsheets have also been posted under the **Model Output – Version 1 – 5Jul2012** heading. These files are identical to those in the model packages, but are compiled here for non-GoldSim user review.

Please let me know if you have any problems accessing the site or any of the referenced files.
