Subject: Follow-up on NMet: GoldSim QA/QC

Melinda, thanks again for providing this document.

I am going to distribute this to the Cooperating Agencies for their information to support their own independent review. One thing that I'd like to provide for them is the final, approved work plans for Task I, and Task I and II.

Can you (or someone else on the team) provide the final versions of the Task I and II work plans for me? Erik did maintain an archive here but I am not sure what ended up being the final ones. I believe providing the ERM team's work plans will better allow the Cooperating Agencies to understand the work that was done, logic behind it, and the conclusions.

Your assistance here is appreciated. Thanks. Bill J.

Subject: NMet: GoldSim QA/QC

Hi Bill,

Attached is the memo containing the QA/QC evaluations for the Mine and Plant Site Models. The overall conclusion is that "there is good evidence that the v5 GoldSim models are functionally accurate and have addressed all issues identified by the ERM Team. The Team concludes that the v5 GoldSim models have acceptable reliability and can be used as a basis for assessing environmental impacts in the SDEIS."

Thank you,
Melinda
