**Attachments:** Flowchart sketch.pdf

Erik,

We should be able to pull flowcharts together by May 7, and Cory and I are available to walk through the models. That would be the earliest date that we could make this work.

FYI, the attached sketch shows what I think this flowchart would look like for the portion of the model shown in the screenshot below (flow chart of the "Container" elements hierarchy, plus water and mass linkages). Fred, please let me know ASAP if this wouldn't meet your needs at this point.

Peter

**Subject:** GoldSim structure meeting

Monday May 7 looks like a good day for PCA and DNR staff.  
Peter and Tina can you be ready for a discussion on the GoldSim flow chart?  
Fred, Who from your shop can make it in person on that day?  
I'd like to get something on people's schedules ASAP and if our plans change then that's fine, just want to preserve the option.

-Erik
