**Subject:** NorthMet EIS: MCEA comment letter  
**Attachments:** myers Northmet data needs memo 062112.docx

Good morning,

A Minnesota statewide non-profit organization called the Minnesota Center for Environmental Advocacy (MCEA) has retained a consultant, Tom Myers, to review the NorthMet EIS water modeling documentation and provide input to MCEA. Mr. Myers has independently completed his assessment of the water modeling documentation and provided it to MCEA who provided the assessment to the DNR.

The state is required to consider information that comes into our record during the NorthMet EIS process. To that end, I would like you to read and consider this document as you work on water modeling tasks. If this memo raises an issue for you or your staff, please pick up the phone and give me a call so we can discuss it. Thank you.

Erik Carlson, AICP
