Subject: RE: NorthMet Required Model Updates

Bill/Mike/Al

This looks good with just a few comments:

- Need to extend duration of modeling for solutes showing increasing trend at 200 years at property boundary for plant site until peak is reached
- We believe their Flouride standard is incorrect (Barr showing 4 mg/L and we believe the standard is 2 mg/L)

Please let me know if any questions

thanks

Subject: NorthMet Required Model Updates

During our meeting on Wednesday, it was requested that Barr prepare a list of changes that need to be made to the NorthMet GoldSim water quality models the next time they are updated. Attached is the current list of changes we are aware of. If there are other changes that you believe need to be made, please let us know ASAP as we will be updating the models early next week.

Thanks,
Tina
