**Subject:** RE: Plant Site Model Inputs QA/QC

Thanks tina

Erik – I assume we have your authorization to proceed (actually I think you have already sent it)

So Fred – please go ahead and get started, pull in Paul and Houston as needed and keep Melinda and I informed

thanks

This may have been an oversight on our part...we only sent this to Fred. I apologize for any delay this may have caused.

**Subject:** Plant Site Model Inputs QA/QC

Fred,  
The Plant Site model has been uploaded to the project website for ERM's inputs review.  
[https://www.barr.com/ClientRes/Projects/Polymet%20Mining%20Corp/Water%20Model%20Results%20-%20Agency/index.asp?project\\_id=471](https://www.barr.com/ClientRes/Projects/Polymet%20Mining%20Corp/Water%20Model%20Results%20-%20Agency/index.asp?project_id=471)  
The zip file (called "Base Model.zip") is in Section 3, Model Files. There is an existing conditions model and a project (base) model.  
I also included the applicable documents in the documentation folder.  
Finally, I included an excel file of the work plan tables and color coded the inputs in Table 1-1. I color coded them to distinguish which model inputs are used for the project and which are used for existing conditions. Both models will have to be checked against the work plan but the existing conditions model will have less inputs since it is not modeling the project.

Please, if there are questions, do not hesitate to give me a call or email.
