Subject: FW: Plant Site QAPP

Greetings,

We have received the Plant Site QAPP from Barr for internal review. You are invited (lucky you) to provide comments on it. I am most interested in actions that Barr is not doing or should be doing to a greater degree to ensure the reliability of their modeling. This should be reviewed in the context of the Co-lead QA/QC work plan. Please provide any comments in the spreadsheet by end of day May 11. Thank you!

-Erik

Erik-
Attached is the Plant Site QAPP. I wasn't sure who you all wanted to review this document so we haven't gone through our normal posting and email from Lisa process. If you think that appropriate, we will do that. Otherwise, please distribute/notify as you see fit.

Let me know if you have any questions,
Tina
