I am sure there is- I have copied Fred

I am planning to be in St Paul next Wed – Fri, although I hear there may not be a MRC meeting Wed

So at least I would have some free time now wed afternoon when I could meet with Barr – Fred, would that work for you?

If not please suggest some alternative times

All - enjoy the weekend

Hi Dave,

Are there any times next week when your QA/QC crew is available to talk to Barr about the outcomes of the Plant Site QA/QC?

Erik-

I guess this could be added to the agenda for the May 30th meeting if you think that is easiest logistically. However, I think we only have a couple of questions for ERM and then just need to figure out procedurally how to wrap this up. A 1hr call between ERM, Barr and you should be able to work as well.

Tina,

Would you like me to add a "plant site QA/QC follow up" item to the agenda for our May 30 model results check meeting? This is the easiest logistically.

Erik

Steve (in Erik's absence),

We have finally had a chance to really digest ERM's review. We do think it would be beneficial to have a brief meeting with ERM to discuss their comment. They made a few recommendations for the model and we would like to talk with them about how those can be implemented. In addition, it would be great if they could provide us with a copy of the model they created and referenced.

Please let me know if you would like me to organize a meeting with EMR or if that is something you are willing to do in Erik's absence.

Thanks,

Tina

Tina,

Let me know how you would like to proceed. I'm thinking a meeting to discuss the QA/QC results and then a Barr simple document identifying what changes are agreed to be made and where. The next ERM inputs check would look to see

that the changes that were agreed to be made to the model are made. Changes that were agreed to be made to the plant site work plan could be covered in a CDF. There is probably a couple ways to tie this up and move on.

Erik

Here is the Model Evaluation Review of the Plant Site Model

Please feel free to circulate or let us know if you have any comments

thanks

David,

Please find the attached memo summarizing the results of this evaluation. We make a number of recommendations on how the model writes the EXCEL tables to streamline future evaluations. Feel free to contact me if you have any questions regarding this deliverable.

Regards,

Fred
