Subject: Misc follow up

Erik

Here are a few updates on various things that I believe I owe you:

- Revised Phase II Model Evaluation Plan – will have for you no later than Tuesday April 10th
- Recharge Rate used for GW Flow Path Modeling at the Plant Site (from your Model Results Tracker – Agency Unresolved Comments tab – Comment # 9) – just confirming that I spoke to Fred Marinelli and we consider this item closed – Barr just needs to add some language in the Work Plan/Data Package, but we are comfortable with the values proposed – you asked me about this during last weeks MRC call and I said I thought this was the case but wanted to confirm with Fred – have confirmed and this is ok as far as ERM is concerned
- I have staff working on the co-variance correlation question – should have info ready for next Wed MRC call

Thanks, talk with you tomorrow
