Dear Mr. Schultz,

I have been in contact with Robert Smude from your department regarding a data request that I filed last year. For reference, the original request is here:

Mr. Smude recently provided me with digital data relating to Tritium sampling from ground-water sources. I am following up with Sherrie Flaherty in regard to sampling data gathered near nuclear facilities, and hope to have resolution on those records soon.

Also, I am curious if your agency ever determined if previously discussed paper records (reaching back to 1953) still exist at MDH. If so, I would be interested in inspecting them and making copies.

Please let me know if the paper records have been located, and thank you for your assistance.

Best,

Matt Ehling
