**Subject:** DOD Exercise LEO Support Plan and Training  
**Attachments:** DOD Exercise LEO Support Plan VERSION 1 - Minneapolis - ST Paul AUG 2014.docx  
**Importance:** High

ALL – Attached is the LEO plan for the exercise. It covers the mass briefings, by jurisdiction support for specified events, and training days. As per my inbrief – where we are training by date is very sensitive – especially not to get media release – please do not distro to those without a need to know.

The intent is we will go to a version 2.0 of this document upon completion of the July PDSS for any minor tweaks or changes like a property not being signed.

I will continue to be the primary DOD POC for the LEO's throughout the exercise. I will insure each LEO jurisdiction lead is tracking all events at their respective sites. I am requesting LEO leads to assign their personnel and I will linkup each site DOD RSO to brief the LEO's in detail (optimum would be a name/cell # for the lead of each group). For coverage – your daily attire (plainclothes, in uniform, or SWAT attire) is fine – we are looking primarily for the ability to use your vehicles/credentials/authority to assist with public safety/control and media control. Each officer should bring eye pro/ear pro/plates if they intend to observe training. The intent for the specified officers in this is to control the site first/observe training second.

There will be countless opportunities to observe training – we can discuss sending additional personnel if you so desire to observe as well. Think about the location/time – you may require NVG's to see anything at particular sites, etc.

We are looking for feedback on the training days so we can properly plan for RSO's, etc.

Let me know if you have any issues/concerns on the attached or if there is a request that cannot be supported.

THX!!!!!!
