Subject: Training

Gents – getting inquiries from Minneapolis PD (Mike) about us training you, I am sure it relates to the media coverage on “Militarization of Law Enforcement”.

Couple notes – as your leadership deals with this, the same rules apply on operational security for us as to relationships – our trip – the training, etc. We are directing our folks to remain on all your local social media to capture anything that comes out in release. What’s at risk here – our future relationship. Your trip this way next year and our future trips that direction. I am not directing this at you - I am asking you to be diligent with your seniors in reminding them of this. It’s a huge loss for all if they cannot be disciplined since we are not in the immediate area the rules do not change. ST Paul is already on the “cliff” with their recent town councilman’s actions. It must be controlled.

Now – for your benefit:

U.S. Special Operations Command (USSOCOM) policy memorandum 13-28, Military support to civilian law enforcement agencies dated 12 Dec 2013 and Department of Defense (DoD) instruction 3025.21 Defense support of civilian law enforcement agencies (CLEA) dtd 27 Feb 2013 are the documents that made our training legitimate and within US law. USSOCOM delegated the authority to our higher HQ March 10, 2014 with the following caveats:

Bi-lateral/combined training, exercises, subject matter exchanges can be approved by major command General/Flag officers and ensure activities are limited to those that: further SOF readiness, directly relate to USSOCOM mission essential tasks, do NOT exceed the training and experience level of the CLEA, and are at no additional cost to DoD for reimbursement.

Thanks again for an excellent trip and support that would be hard to match anywhere. We understand that your senior leaders will act regardless of your input, unfortunately the actions come with a price regardless of the source.

Brown, Amy (CI-StPaul)
