Headquarters and Mixed Use Development Letter

I'm a little concerned about the comments about met council that are surfacing in this thread. I would stay with conversations with staff first. Steve Peterson is the transportation staff person who attended the meetings. I know him well and suggest we start with him. Yes his boss is Arlene McCarthy- I know her well and she is very technically oriented and first priority is protecting the regional system. Dunnick will back her up. Let's sort thru the technical issues first. I saw this coming and would not be surprised if we got a similar request from Dakota County.
