Subject: RE: FW: Uber Mapping Media Plan - Vehicle Registrations?

I have just been advised that all 5 vehicle registration records for the Ford Fusions have been reinstated. The registration for each one is current until 11/16/2017.

Hi all,

We've discussed internally – the registrations should be reinstated tomorrow morning – if you could please be sure your vehicles are not back on the road prior to that point. Should we be asked our statement to the press will be as follows:

The DMV worked with Uber to reinstate the registrations for 6? Vehicles – with the full understanding that the vehicles will be used in a mapping capacity only. Several companies in California use vehicles such as this for the same purpose. Should Uber decide they want to revisit the issue of self-driving technology on the streets and roads in California, the offer to help them secure proper permitting stands.

Any questions, please let me know.
Melissa

Hi Brian,

On previous calls, we were asked to share our lanaguage and outreach plans a full day in advance. Do let me know if we should adjust anything described in our plan.

Best,
Chelsea
