Can we take a glance at current shelter stayers and see how many have been there for a year or more?

No we don't have good data. The only place we get it is from the PIT and we know it is bad.

Do we have accurate info on reductions in chronic homelessness? I know we were concerned about our LTH pit count numbers.

Hello Mikkel,

I know we have a housing first approach. Can you send me a dashboard or something similar that shows the trends and reductions in homeless populations in HC? The following article was an interesting read.
