Bruce Gordon
Minnesota Department of Public Safety --

A few months ago, as part of our records' request related to the Dakota Access Pipeline, we asked the Hennepin County Sheriff's Office for all internal emails during the month of November 2016 related to the pipeline project and the sending of sheriff's deputies out there.

The county, as you can see from below, is saying that request -- like our earlier requests related to Minnesota law enforcement officials being sent to North Dakota -- also has to go through your office.

Can you tell me where this particular data request stands?

Thanks.

Hi Mike,

Sorry for the delay, I thought I left you a voice mail after your previous email and I further apologize if I didn't.

All DPRs related to the EMAC mission are being staffed through the state DPS office (although it might be the HSEM office specifically working the requests). We are tracking the requests that have been placed and/or responded to, but I'd need to refer you to the state for a specific answer on where your request stands.

V/r,
Mike

Michael Sheehan
Hennepin County Sheriff's Office --

Just circling back to see where this stands. Thanks.

RE: Dakota Access Pipeline

Hi Mike,

Just to be clear- you're just asking if the DPR you submitted on Dec. 3, 2016 is still be worked? Is that correct?

V/r,
Mike

Michael Sheehan/Hennepin County Sheriff's Office
Bruce Gordon/Minnesota Department of Public Safety --

The Minnesota Department of Public Safety recently released documentation to us regarding Hennepin County's sending deputies to North Dakota for the Dakota Access Pipeline project. That came following a request we made directly to the state DPS.

But I wanted to ask about something related, but separate.

We were still wondering about our separate state Data Practices Act request to Hennepin County (dated Dec. 3, 2016) regarding all correspondence for the month of November 2016 involving the sheriff and his staff regarding the North Dakota deployment.

If I recall correctly, Hennepin County had indicated to us that all such information would have to be cleared first by the state DPS.

I'm just circling back to get an update on that request, and to make sure that has not been lost in the shuffle.

Thanks.
