Thanks. We will continue down the path of MAC IT creating it, but just want to make sure we are looking at all options.

Afternoon Phil,

I believe we have a system called a STMP that is used at the Masters. I know this is a program that has issues and if they pilots are not willing to "play nice", it doesn't work very well. The PPR we used for the Super Bowl was provided by the NFL and with the FBO's managing it and charging a fee, it worked pretty well. I will do some digging to see if I can come up with other options.

Thank you,

Hi Kurt, one thought – do you guys use any type of flow control program, and if so, is there an opportunity to use it in this case as a reservations system?

Phil

Good Afternoon Phil,

I hope you are enjoying the summer. It sure has been an interesting one with the heat and weather.

I would like to be included in the discussion regarding the event an a reservation system. Please let me know when you are conducting the meeting and I will make sure we attend.

Thank you,

Subject: Final Four

Hi Kurt, we are initiating plans for Final Four. One thing we need to do is create a reservation system similar to what the NFL used for Super Bowl. I will be pulling a meeting together that includes MAC IT and stakeholders to discuss how the program needs to function. Is this something you and/or your team wants to attend and be involved with?

BTW – I will also be standing up a planning committee that will look and function similar to the SB committee. Stay tuned for that notice...

Thanks.
