Hi Michael,

We are planning to have the EA for the lease renewals done before end of year. However, there are other issues such as the terms of the lease that have to be considered and those will be handled by the State Office as I understand it. Consequently, I cannot answer the question with any certainty exactly when everything will be ready for the issuance of the renewal. I suggest that you work with Jessica on determining how you can best help out. I know the company is very anxious about this as we are in almost daily communication with them on various issues. I suggest that any communications you have with them regarding the lease renewals be coordinated with Jessica to ensure we are giving the company a consistent message.

Thanks for your help Michael,
Regards,
Dean

Hey Randy, I understand Theresa forwarded my question about NEPA on the two lease renewals for Beaver Bay/Franconia.

The reason I asked about the NEPA earlier today was just to see whether or not we might be having to issue a suspense of operations on the leases in question (1352 and 1353), or if we will be able to finish up by year's end. One thing I can certainly do here is get the leases ready for issuance once the NEPA is finished so no time is lost there.

Just wanted to offer any assistance Randy.....I know the company is very anxious.

Thanks!

Michael G.
