To: Karen Hanson <karhan@██████████>

Sure, Karen. I am obviously curious about the interest by a member of the BoR in a telecom company, but also aware of government concerns about a number of Chinese businesses.

Best,

Mos

ps: Is it OK if I share your note with the BoR? (I doubt it will produce another request for info, but it might.)

Karen,

We have had several CSE faculty members who have had funding from Huawei's US labs. These have usually come as research gifts. Together with Tom Luo, I spent a day at Huawei's main campus in Shenzhen last June (my second visit there over the past several years) for discussions and a presentation by Tom Luo on his wireless communications research.

Best,

Mos

Dear Colleagues,

I'm following up on an inquiry from a Regent: Do we have any research ties to or funding coming from Huawei Technologies?

Thanks for whatever information you can provide,
karen
